About This Content

Hovan Revenge - is an additional storyline of Bloodbath Kavkaz. This is a tragic tale of a forgotten vlogblogger and stand-up comedian Jury Hovansky, which is happening during the main story of Bloodbath Kavkaz. Left by his best friends and dissatisfied with his own life, Jury, while being in a deep drunk dream, hears out his Alter ego and decides to fight his enemies and restore the justice.

very good game about stronk stick people with pew pew machines.. Customisation options, good story, and a lot of post-game content, aka dungeon delving and grinding. Definately worth the price if you are looking for a single player game (also runs great on older machines). great game, fun.. This is a very beautiful game in both visual and audio. The music was surprisingly nice. There is a LOT of thinking outside the box. If you struggle with puzzle games you will easily get frustrated, luckily though there are some amazing guides to assist you. They helped me wil a few of the more trickier ones!

This is a SHORT game and I don't see any replayablity. Please keep that in mind when you purchase!. the game is good but the first "boss" is almost imposible. 7/5 Threw grenade to my grandma and she went flying outside the window xD best way to use 4 euros :D. 17 hours for 100% completion because the full menu Trophy is really hard to unlock all , anyways this game is perfect !

I played the iOS version of this game for countless hours. It's a lot like Trackmania so if you like that you'll like this. Overall it's just a really fun game and well worth the \$10.

I highly recommend you take advantage of the controller support for this game. Playing this with a keyboard is kinda weird and it's much easier with a controller.

8V10. ***Trigger warning: suicide, zombies***

In case you like old school games with 8bit/16bit design and like black humour: try this business simulation... with zombies. Build up a firm that sells deathly jumps from the top of your company building to suicidal customers. Research and build facilities to improve the dark mood and death wish of your clients, run ads and defend against the arriving waves of the undead before they kill your paying customers for free.

The game supports Chinese and English language settings. It's originally written in Chinese. The English translation might be called "Engrish"-like. Which is not really a drawback - I'd say the translation is not too bad and understandable enough, maybe even adding a bit of extra fun. ;-)

Just to clarify: my Chinese would be a lot worse than the game's English, I think the translator did quite well for someone who's not a native speaker, I'm really happy the translation enables me to play this great game! Thank you, great job! :-). This game advertises tracked motion controller support which would make you assume this game functions with Oculus Touch natively through the use of OpenVR. Even when using Touch, the game thinks you're using a gamepad so you cannot use motion controls. Cannot recommend for Touch & Rift users.. Pretty cool. The level design was amazing. There was so much detail and it all looked great. SDE takes away a lot of details at long distances though (but that's gen 1 hardware). Unfortunately they catered to the lowest common denominator in VR which is the rift without touch so you don't have hands. They could have spent a little extra time with motion controllers and made things grabbable and it would've been a lot more fun. I'm not even sure it was fun but it was really nice to look at and free so I'd still recommend it. Glad to see AAA quality stuff in VR and I can't wait for a full Deus Ex VR game.. The game is slowly getting a better shape than before. Performance improved, weapons improved and AI also slightly improved but lacks a couple things here and there. Not major problems though. If the dev keeps the work up like this Sneak Thief might make it back to YouTube once again. I see a great future for this game and honestly with the new stealth feature(hopefully features in the future) it gives a better heist experience for the player.. When I first played this game in January 2017 I gave it a thumbs down. The controls were inconsistent (For me) to the point that the game became unplayable. I decided to try in again in August 2017 and to my relief the controls were much more consistent.

There are other problems with the game that was so frustrating I uninstalled in. Half the time when trying to jump off walls, the game didn't pick up the press of space bar. This bug was tolerable since levels only take a few seconds.

What ruined the game for me was the hit detection on the pink block. Most of the time I should have missed the pink stuff but the game detected that I touch it. If the pink object was in the middle third of the screen that's fine, but when the object is on the right 1/4th of the screen that's a problem.

I really wanted to like this game but it became unplayable and as such I cannot recommend it. I will take a look at it in a few months to see how it is then and update my review.
